

Schindler 3300

A flexible standard solution that unifies form and function. Our passenger elevator for residential and commercial buildings.

Key figures

Capacity	400-1125 kg, 5-15 passengers
Travel height	Max. 75 m, max. 20 floors
Entrances*	One- or two-sided
Door width*	750mm, 800mm, 900mm
Door height*	2000 mm, 2100 mm
Car height	2135 mm
Drive system	Eco-friendly gearless machine, frequency controlled, machine room-less
Speed	1.0 m/s, 1.6 m/s
Interior	Two style sets and three décor lines or Libertà concept
Flex edition	Extended car and door flexibility

* For possible combinations, see the planning data on page 28.

NEW

The essentials for comfortable mobility

Solid performance

The Schindler 3300 was designed to meet Swiss standards of precision – reliability is built in. Enjoy worry-free operation day in and day out.

Space efficiency

A larger car for standard-sized shafts. Smaller technical components allow roomier car dimensions and more personal space for passengers.

Green mobility

Engineered to be energy efficient and eco-friendly. A quieter ride means less noise pollution as well.

Choice of design

Choose an interior style from our ready-made décor lines or create your own. Either way, it's a perfect match.

Solid performance

Schindler's best selling elevator since 2006 – a true technological evolution. Highly standardized yet flexible to install. System engineered with components built to fit together. The result: a smooth and silent ride for passengers in residential and mid-size commercial buildings.

Full capacity

up to 1125 kg
up to 15 passengers

New heights

75 meters
20 stops

Convenient operation

Automatic evacuation
Automatic re-leveling

Smooth operation

1.0 m/s, 1.6 m/s
Silent and smooth
running

Space efficiency

Less space creates more room. Specifically designed to minimize the space required for technical equipment. The control cabinet fits into the landing door frame and the drive is directly installed in the shaft, eliminating the machine room.

The Suspension Traction Media (STM) enables a smaller traction diameter of 85 mm, translating into a smaller motor size.

Less space for components, more room for the passengers. Up to 25 cm wider car that still fits in standard-sized shafts.

Shaft dimensions* width x depth	Previous		New	
	Passengers	Capacity	Passengers	Capacity
1400 x 1450 mm	4	320 kg	+	5 400 kg
1500 x 1600 mm	6	450 kg	+	7 535 kg
1500 x 1650 mm	6	450 kg	+	7 535 kg
1600 x 1600 mm	6	450 kg	+	8 625 kg
1600 x 1650 mm	6	450 kg	+	8 625 kg
1600 x 1750 mm	8	630 kg	+	9 675 kg
1650 x 2450 mm	13	1000 kg	+	15 1125 kg
1800 x 1700 mm	8	630 kg	+	10 800 kg
2000 x 1700 mm	8	630 kg	+	13 1000 kg

* Applicable to cars with one-sided entrance and speed of 1 m/s

Green mobility

Caring for tomorrow starts today. The Schindler 3300 is a lightweight elevator free from harmful substances and designed for low everyday energy consumption. The operating efficiency remains steady over the course of its lifetime – and this elevator is almost 100% recyclable.

up to 30%

Clean drive technology

Thanks to the regenerative PowerFactor 1 drive technology, the Schindler 3300 uses up to 30% less travel energy compared to conventional technology. Excessive energy is “clean”, allowing it to be fed back to the grid without causing equipment interference due to harmonic distortion.

up to 40%

Standby mode

When not in use, the Schindler 3300 consumes up to 40% less energy for inverter, controls, lights and ventilation. Wake up is instantaneous.

up to 20x

LED lighting

LED lights have an extremely long service life, up to 20 times longer than standard light bulbs, while consuming less energy. All ceilings and operating panels in the Schindler 3300 are equipped with LED lights as standard.

Energy efficient operation

Superior everyday performance should not be synonymous with higher energy consumption – and with the Schindler 3300 it is not. Thanks to its lightweight system, precision engineering and energy-saving features, the Schindler 3300 achieved an A-classification for energy efficiency according to the VDI 4707-1 standard.*

* The VDI 4707-1 standard regarding the energy efficiency of lifts is established by the Association of German Engineers (VDI). The VDI 4707-1 standard classes range from “A” to “G”, with class “A” being the most energy efficient class. The given result is based on measurements and valid for a Schindler 3300 in VDI usage category 1 with a load of 675 kg, a travel height of 17m, a speed of 1,0 m/s and with optional energy-saving features (e.g. Recuperating Frequency Converter (PF1)). The VDI classification and energy consumption of individual installations may deviate from this result, e.g. due to different or additional customer options and/or different configuration.

Choice of design

The Schindler 3300 elevator unifies design and functionality in a way that makes passengers feel comfortable and safe. Combine style, colors and options to suit your building. Carefully selected materials enhance the look and feel.

2 style sets

Choose Round for a smooth organic appearance, or Square for a modern linear look. The style sets are expressed through the ceiling, corners and handrail design.

4 design lines

From fresh and lively to warm and inviting, choose the wall and floor color you want from our three distinct décor lines. When it comes to customizing your elevator car interior, our Libertà design line sets you free.

41 colors

From fresh and lively to warm and inviting, choose the wall and floor color you want from our three distinct décor lines.

A great look always comes in style

Car interior style sets

Make a statement

When deciding on an ambiance for your elevator car, start with the basics: Round or Square? Then choose wall and floor colors from our three décor lines, all manufactured from high-quality materials. Add details like matching operating panels, mirrors and handrails to bring the style to life.

Round style set

Create a smooth and organic feeling. The Round interior style set comes with:

1. Bracket or Curve ceiling
2. Rounded handrail as option
3. Curved corners

Square style set

Convey modern functionality with a minimalist and clean interior décor. The Square interior style set comes with:

1. Line or Spot ceiling
2. Straight handrail as option
3. Corner less car

New Flex Edition

Outstanding flexibility: Schindler 3300 offers you the largest flexibility in car and shaft dimensions. With this option the elevator adapts with millimeter accuracy to your building.

Flexible Car Dimensions

The Schindler 3300 concept ensures more space for your passengers – even in small shafts. Car dimensions are adjustable in 10 mm increments – to guarantee optimal use of space. The car width ranges from 760 mm up to 1600 mm and the car depth can be selected between 900 mm and 2100 mm. Car height can be increased up to 2400 mm. This flexibility makes the Schindler 3300 your choice to reach your building requirements.

Flexible Door Dimensions

Thanks to the flexible door system the position of the door can be placed with millimeter accuracy. The door width is adjustable in 50 mm steps and offers a height between 2000 mm and 2300 mm. Variable door opening mechanisms such as telescopic door (T2) and center opening doors (C2, C4) are available. Choose between single or two-sided entrance (through-loading).

Higher Doors – up to 2300 mm
Wider Doors – 600 mm to 1100 mm

Higher Cars – up to 2400 mm

Additional weight allowance for local cladding – up to 300 kg

Thicker car floors – up to 40 mm

Longer car operating panels –
Full car height

The new flex edition is designed to fit your commercial demands

Higher doors and cars with wider entrances have been introduced to match high entrance halls, complementing the commercial look and feel of your building. The interior design is fully customizable allowing you to tailor your elevator car creating a superior customer experience.

Stainless steel panel line

Characteristics and options

Operating Panels

Our sleek and wear-resistant combination of stainless steel and glass is equipped with mechanical push buttons. The line consists of car operating panels and landing operating panels as default elements. For clear navigation throughout your building, indicators and nameplates can be supplied.

Keypad

The keypad features a conventional layout. Each floor is listed separately, ideal for low-rise buildings. Buttons will be arranged in single, double or triple columns, depending on the number of floors.

Glass panel line

Characteristics and options

Operating Panels

Our stylish and modern glass panel line is equipped with a touch-sensitive keypad. The line consists of car operating panels and landing operating panels as default elements. For clear navigation throughout your building, indicators and nameplates can be supplied.

Keypads

The glass panel line features two keypad versions for car operating panels. A ten digit layout, allowing passengers to compose the desired floor number (like a phone); and a conventional layout listing each floor (best suited for low-rise buildings). Buttons are arranged in triple columns.

Car operating panel

Providing urban mobility.

Mobility is an essential requirement in the world in which we live and work. Schindler stands for urban mobility and is recognized as a hallmark of quality and safety. Daily, one billion people worldwide place their trust in Schindler products and services.

Schindler provides urban mobility with elevators, escalators and services that are engineered for efficiency and sustainability. Schindler accompanies the development of buildings from planning and construction to daily operation, thus safeguarding their lifetime value.

Ingenious planning

Selecting the right mobility solution means to analyze the building requirements and to calculate the potential traffic patterns. This is at the core of Schindler's planning support to ensure efficient mobility and a convenient journey for passengers. Bringing together global know-how for each individual project.

Schindler planning services:

- Expert consultants for traffic and product planning
- Traffic analysis and calculation service
- Specialized engineering centers for customized configurations
- Planning guidelines and tools to expedite shaft planning, building layout and product selection/configuration

Seamless delivery

With a full-range portfolio of elevators and escalators, Schindler provides mobility solutions for any building application. Schindler customers can rely on sustainable technology, excellent project management and profound installation methodologies. It's always the perfect fit.

Technology for all building types and mobility needs:

- Residential and office buildings
- Commercial towers, retail environments
- Hospitals and public buildings
- Heavy-traffic environments
- High-rise buildings
- Cruise liners

Efficient operation

Smooth, hassle-free operation and very high availability are the result of professional maintenance and modernization. Environmental and operational efficiency add value to the investment. Reliability and sustainability – every day, all day.

- The maintenance, repair and modernization portfolio:
- Global network of branches and service points
 - Skilled and certified technicians and fitters
 - Service solutions for all building types and requirements
 - Availability and fast delivery of spare parts
 - Quick responding call-center services
 - E-monitoring diagnostic tools
 - Replacement and step-by-step modernization solutions

Continuous enhancement

Schindler constantly develops new products and features to set standards and increase efficiency. Technological milestones that provide mobility to the urban society – conveniently, safely and ecologically. Progress needs innovation.

- The cutting-edge developments:
- PORT Technology – traffic, building communication and access-control management that calculates the swiftest route in the building
 - Schindler regenerative PF1 clean drive technology
 - Space-saving, weight-optimized designs
 - Flexible modernization concepts from full replacements to partial retrofits
 - Eco-mode options for escalators and elevators

When vision meets discipline. Schindler partners with Solar Impulse.

Schindler is a main partner of **Solar Impulse**, the zero fuel airplane aiming to fly around the world propelled only by solar energy.
